Vision 2022

KSE Mission

What do we exist for?

In a world of colliding economic, political, technological and nature-led forces, Ukraine in its current shape and form is not a sustainable player. For the country to survive and thrive, to be a value for the world and to itself, Ukraine must nurture a very strong intellectual capacity.

We exist to build the intellectual foundation for a strong and innovative economy of Ukraine.

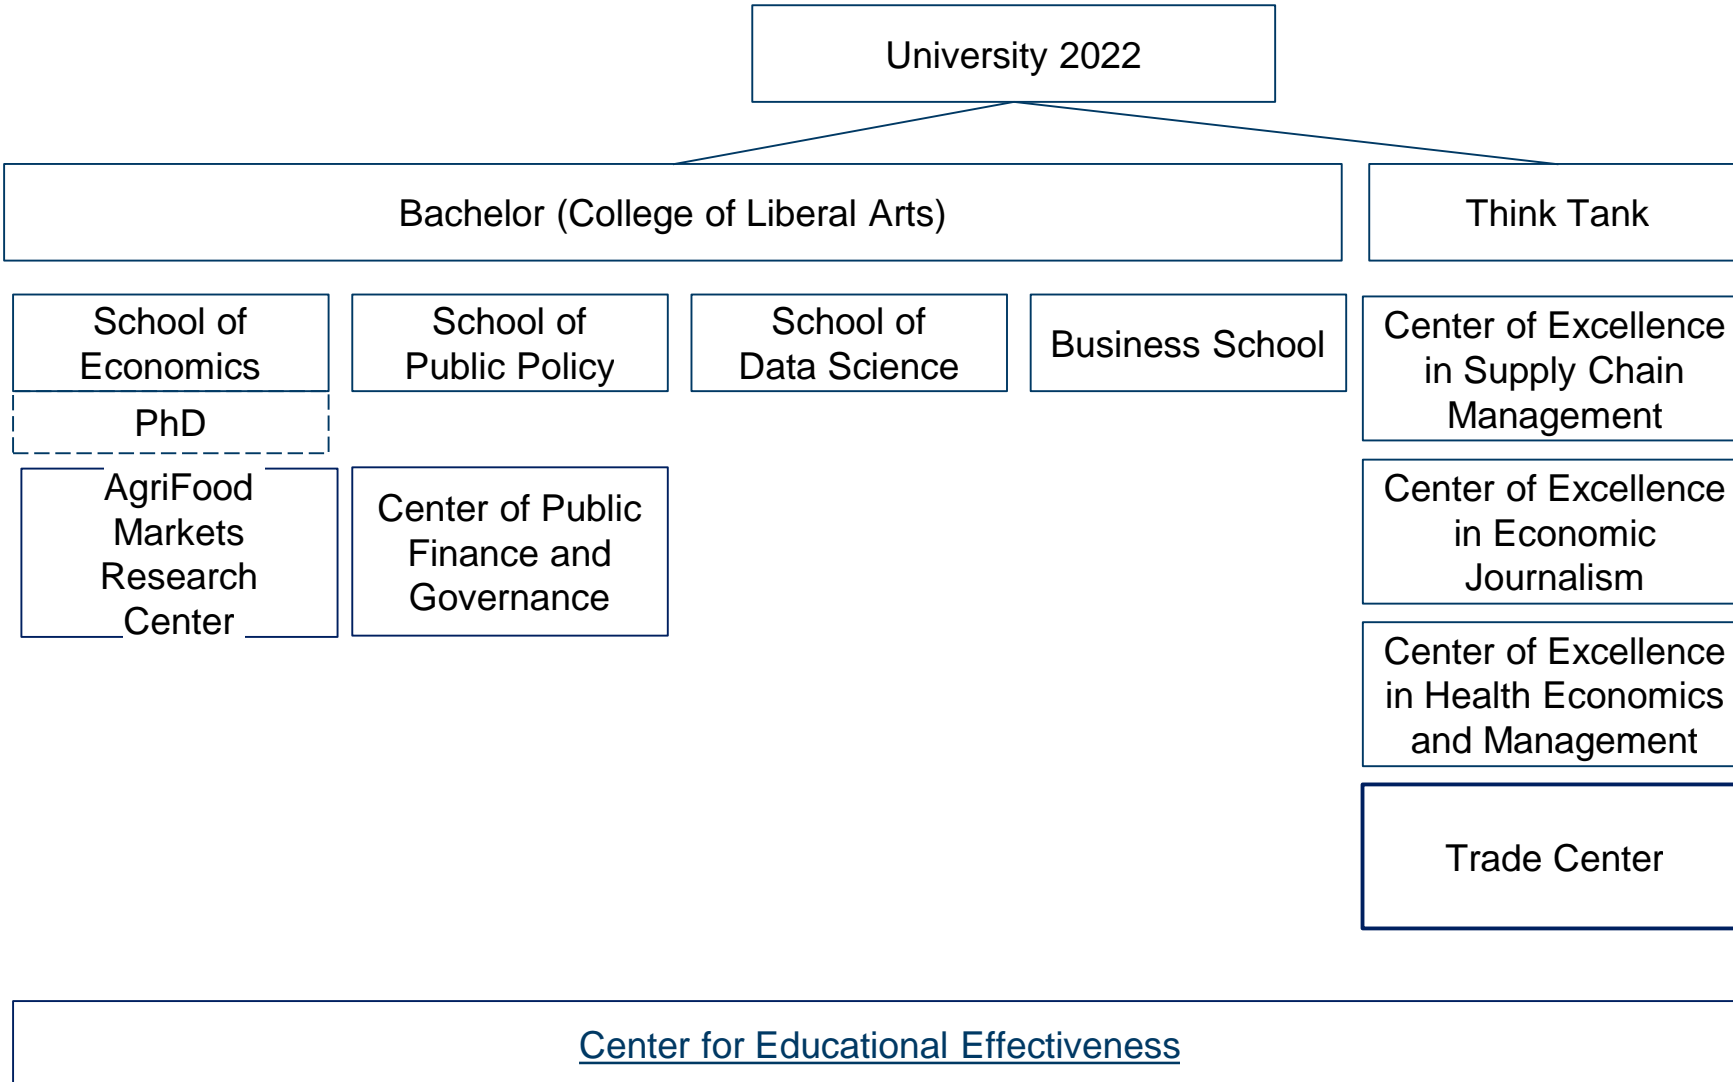

What is our role?

**We are the tipping point
in invigorating growth
of the Ukrainian economy
for maximum impact
in the world economy**

How do we fulfill our role?

We build a University that produces high-quality original research and raises a critical mass of competent people for economic and public policy reforms, transformation of business culture, and economic growth.

KSE Vision 2022

2018

KSE/SSE Riga cooperation on bachelor and master programs

MBA-AI and Data Science Track at BFE Program

2019

Search for campus

Data Science Activities

2020

Campus/Prep work for opening BA programs (economics, management, public policy)

Data Science Activities

Prep work for Center for Educational Effectiveness

2021/2022

Bachelor Programs (College of Liberal Arts)

School of Data Science

Center for Educational Effectiveness

Key directions for development

- Continue transforming KSE department into Schools by increasing the number of full-time faculty and enrolled students
- Do groundwork for opening bachelor program
- Diversify portfolio of products for professionals (in the form of short-term and mid-term courses, including online education) to scale up and amplify KSE impact on target audiences
- Scale-up analytical and research work of departments (increase related revenue and publications)
- Establish the Center for Educational Effectiveness to improve the teaching quality and learning effectiveness of KSE programs
