

# 64th issue of the regular digest on impact of foreign companies' exit on RF economy

Prepared by the KSE Institute team and KSE members of the Board of Directors with the support of the International Renaissance Foundation; 02.04.2024-03.05.2024. **We will continue to provide updated information on a monthly basis.**

Disclaimer: At the beginning of the Russian invasion of Ukraine KSE Institute launched an analytical project, which was named "SelfSanctions", aimed to collect data on foreign companies operating in the Russian market and limiting or terminating their activities. Examination of data was conducted jointly with specialists from the Ministry of Economy, the Ministry of Foreign Affairs and the Ministry of Digital Transformation of Ukraine.

The database contains a lot of information; we collect daily statistics on changes in the status of foreign companies operating/operated in the Russian market and limiting or terminating their activities. Also, we created the Telegram bot [https://t.me/exit\\_ru\\_bot](https://t.me/exit_ru_bot) for tracking/monitoring of news on priority foreign companies (coverage 1, 2, 3 or 7 days of monitoring). Also, we do regular analysis of changes in share prices and capitalization of parent groups of companies that have or have had business in Russia.

KSE database is partly based on the [Yale's School of Management database](#), the [University of St.Gallen Paper](#), [epravda.com.ua](#), [squeezeputin.com](#), <https://bloody.energy/> and [leave-russia.org](https://leave-russia.org) websites and other open sources. Data is verified and KSE status is assigned. Data on stocks is taken from Google and Yahoo Finance. At the same time, the KSE database is more complete and comprehensive and contains much more information than most other similar databases, as it also includes data on number of staff, revenue, capital and other financial indicators, the latest updates and changes in statuses, links to used sources, and daily updates from our [Telegram-bot](#) etc.

KSE Institute and Leave Russia project are the part of [B4Ukraine Coalition](#) since mid-2022.

KSE Institute is glad to announce that we [have finalized merging](#) with project [leave-russia.org](https://leave-russia.org) which was developed by a team of volunteers.

Also, we developed an [application in the Apple Store](#), which is available only for mobile devices in addition to our Telegram bot [https://t.me/exit\\_ru\\_bot](https://t.me/exit_ru_bot). It allows you to find any brand or company that is operating in Russia just by scanning barcodes.

On February 24, 2024 KSE Institute merged KSE status "wait" with status "stay" as 2 years of the war gave enough time for companies to leave Russia

## KSE DATABASE SNAPSHOT as of 06.05.2024

Number of the companies **that continue Russian operations** (KSE's status "stay"<sup>1</sup>) – **2 175 (+5 per month)**

Number of the companies **that have curtailed Russian operations** (KSE's status "leave") – **1 223 (+12 per month)**

Number of the companies **that completed withdrawal from Russia** (KSE's status "exited") – **387 (+9 per month)**

**As of May 6, 2024**, we have identified about **3,785 companies, organizations and their brands from 102 countries and 58 industries** and analyzed their position on the Russian market. About 40% of them are public ones, for **~1 575 public groups of companies**, we also identified (where it was possible) their operating business in Russia (the presence of a controlling stake in a legal entity and revenue received) and found the data for 2021 before invasion was started, which allowed us to calculate the value of capital invested in the country (about **\$194.0 billion**), local revenue (about **\$316.3 billion**), local assets (about **\$338.9 billion**) as well as staff (about **1.447 million people**) and taxes paid (about **\$25.6 billion**). **1,223 foreign companies** have suspended or ceased operations in Russia. Also, we added information about **387 companies that have completed the sale/liquidation of their business in Russia** based on the information collected from the official registers (6 full business liquidations and 3 business sales took place in April 2024).

As can be seen from the tables below, **as of May 6, 2024**, **387** companies which had already completely exited from the Russian Federation, in 2021 had at least **541,100 personnel**, **\$96.0 bn in annual revenue**, **\$46.8bn in capital** and **\$76.9bn in assets**; companies, that declared a complete withdrawal from Russia had **226,800 personnel**, **\$43.9bn in revenues**, **\$20.6bn in capital** and **\$36.7bn in assets**; companies that suspended operations on the Russian market had **87,300 personnel**, **annual revenue of \$22.1bn**, **\$35.6bn in capital** and **\$83.7bn in assets**.

**TOP-10 countries and industries by # of companies from KSE database**

Country of HQ	# of companies	Industry	# of companies
USA	772	FMCG+Consumer goods	343
Germany	428	Finance and payments	261
Great Britain	278	Electronics	253
China	216	Energy, oil and gas	241
Japan	178	IT	203
France	176	Industrial equipment	184
Switzerland	158	Pharma, Healthcare	183
Italy	132	Automotive	179
Netherlands	109	Food&Beverages	143
Finland	100	Manufacturing	131

<sup>1</sup> - KSE status "leave" - Companies that have published on the company's official website (or their release has appeared in a foreign publication such as FT, NYT, etc.) that are completely shutting down in Russia or companies that have officially announced that they are temporarily reducing operations in Russia  
 - KSE status "wait" - Companies that have published on the company's official website (or their release has appeared in a foreign publication such as FT, NYT, etc.) that they are reducing only part of their business operations by continuing to work on other operations or companies that have reported delaying future investment / development / marketing, while continuing their core business. **On February 24, 2024 KSE status "wait" was merged with status "stay"**  
 - KSE status "stay" - Companies that ignore exit / downsizing requirements in Russia, as well as companies that have officially stated that they remain in Russia or news of their exit have not been found  
 - KSE status "exited" - Companies that sold their business/assets or its part of the business to a local partner/terminated relations and left the market. Also, for companies that are being liquidated this status is being assigned

The following table is based on 2021 data available for 1 575 TOP public companies operated/operating in RF<sup>2</sup>:

KSE Institute						
Status by KSE	# of companies with revenue in KSE database	Number of staff in RF, 2021	Revenue in RF, 2021, USD m	Capital in RF, 2021, USD m	Assets in RF, 2021, USD m	Taxes in RF, 2021, USD m
<b>exited</b>	387	541 114	95 967	46 844	76 894	5 249
<b>leave</b> , including:	309	314 050	65 957	56 279	120 364	3 232
<i>complete withdrawal</i>	147	226 756	43 888	20 638	36 682	2 328
<i>suspended operations</i>	162	87 294	22 070	35 641	83 682	904
<b>stay</b>	879	591 639	154 373	90 871	141 617	17 077
<b>Total</b>	<b>1 575</b>	<b>1 446 803</b>	<b>316 297</b>	<b>193 994</b>	<b>338 875</b>	<b>25 558</b>

If since the beginning of the Russian invasion of Ukraine, the percentage of companies that closed operations in Russia has risen sharply by mid-April 2022, in the last 20 months the ratio of those who leave or stay is virtually unchanged, although we still see a periodic increase in the share of those companies that remain in the Russian market (by adding new companies to the database, 26 were added in April 2024). However, **if to operate with the total numbers** in KSE database, about 32.3% of foreign companies have already announced their withdrawal from the Russian market or suspended their activity, but another 57.5% are still remaining in the country and only 10.2% made a complete exit<sup>3</sup>.

At the same time, it is difficult not to overestimate the impact on the Russian economy of 387 companies that completely left the country, since in 2021 they employed 37.4% of the personnel employed in foreign companies, the companies owned about 22.7% of the assets, had 24.1% of capital invested by foreign companies, and in 2021 they generated revenue of \$96.0 billion or 30.3% of total revenue and paid ~\$5.25 billion of taxes or 20.5% of total taxes paid by the companies observed. Data on 1,575 TOP companies is presented in the table above.

**To avoid misinterpretations of figures, we would like to stress once again that the KSE Institute database contains financials on approximately 1,575 unique foreign groups of companies, which participate in approximately 2,155 local legal entities. And the total number of entries - is already 3785+ and is constantly growing. It means that the most correct way to calculate the real % of different statuses vs totals would be to take only those companies where we have financials collected in our database. For the rest of the companies we were not able yet to identify companies represented in Russia with revenue earned physically in the country. Those are mainly the foreign companies that have trading relationships with Russia or, for example, Sport (87 entries) & other Associations and NGOs (29 entries), Travel and cruise companies (26 entries), Media (45 entries), Films (17 entries) and Entertainment (24 entries) or companies which never had even representative offices in the country. In our opinion, much more accurate would be to base the calculations of real exits or % of other statuses in comparison with those ~1,575 unique TOP foreign companies where we were able to identify revenue received in Russia by local companies established. For more information - please see the next Charts with details:**

<sup>2</sup> When we analyze # of local companies, # of staff and local financials (such as revenue, capital, assets, taxes paid) - KSE Institute uses data according to Russian Accounting Standards (or RAS) from the [official EGRUL register](#), all steps how we do it are explained in detail in [the Methodology we published here](#). The key source for local financials is data from the Federal Tax Service of Russia. The latest available consolidated data for each group's largest Russian units reported in line with local accounting standards excluding intragroup eliminations and other IFRS or GAAP adjustments. More details are [available here](#).

<sup>3</sup> On 24 July 2022, we introduced the new status "exited", which reflects the companies' actions to finalize the exit from the Russian market. The status relies on data from the Uniform State Register of Legal Entities in Russia (USRLE or EGRUL) and complementary analysis such as companies' announcements and media publications of company activities. At the same time, companies' activities can be hard to track and can be missed in the analysis, especially for companies less covered in the media. We encourage our readers to inform us if they are familiar with the companies' actions that contradict their announcements about the exit via the [Feedback Form](#) at <https://leave-russia.org/>.

# of foreign group of companies with revenue for 2021 in the RF identified

Share of revenue for 2021 by KSE statuses for 1575 companies with financials

As it is visible on the charts based on data for 2021 above, % of **exited** is obtained based on number of companies (25%) and on share of revenue withdrawn (30.3%). At the same time, a totally different picture is for those who are still **staying** - 56% of companies represent 48.8% of revenue received in Russia. The conclusion could be that smaller companies with lower revenue prefer to stay and those who have higher revenue are more eager to wait, limiting their investments as an excuse (at the same time they continue to earn and reinvest their local profit).

KSE Institute has also collected and analyzed data on revenue, capital, assets and net income (profit or loss) in **2022** for ~1495 companies (about 80 companies the data of which we have collected previously have not provided their reporting) and provides below the detailed analysis.

Share of revenue for 2022 by KSE statuses for 1495 companies with financials

Status by KSE	# of companies with revenue in KSE database	Revenue in RF, 2022, USD m	Capital in RF, 2022, USD m	Assets in RF, 2022, USD m	Net income in RF, 2022, USD m	Profit tax paid in RF, 2022, USD m
<b>exited</b>	387	62 328	27 184	60 011	3 541	1 178
<b>leave</b> , including:	289	34 003	44 271	114 709	-74	807
complete withdrawal	137	24 339	14 804	33 640	278	501
suspended operations	152	9 664	29 467	81 069	-352	307
<b>stay</b>	819	139 654	59 235	161 861	11 624	2 834
<b>Total</b>	<b>1 495</b>	<b>235 985</b>	<b>130 690</b>	<b>336 581</b>	<b>15 090</b>	<b>4 819</b>

As you can see from the charts above, companies which **fully exited** Russia were able to generate 3.9% less of revenue in 2022 (26.4% from total volume) than in 2021 (30.3% from total volume, which is clear as most of them left the country before the year-end). **Leaving companies** also generated much less (-6.5%) revenue in 2022 (14.4% from total volume) than in 2021 (20.9% from total volume). At the same time, **staying** companies were able to generate much (+10.4%) more revenue in 2022 (59.2% from total volume) than in 2021 (48.8% from total volume). So the key conclusion is that money matters for those companies who are still tied with its local business in Russia and they were even able to gain more.

Summarizing the results of new data received for 2022 and comparing it with 2021 we can see the positive trends in terms of significant revenue and capital decline. Only assets have almost not changed (\$336.6bn<sup>4</sup> in 2022 vs \$338.9bn in 2021) and would even probably increase if the remaining reporting for ~80-90 companies could be obtained (until companies decide not to disclose it). KSE Institute has published before a large-scale study "[How the income of foreign businesses in the Russian Federation has changed in 2022 and why so many companies still do not leave](https://papers.ssrn.com/sol3/papers.cfm?abstract_id=4453963)". You can familiarize yourself with the English version by downloading the report at the following link: [https://papers.ssrn.com/sol3/papers.cfm?abstract\\_id=4453963](https://papers.ssrn.com/sol3/papers.cfm?abstract_id=4453963).

At the end of November 2023, the KSE Institute published a **new study** entitled "[Analysis of foreign business exits from Russia](https://papers.ssrn.com/sol3/papers.cfm?abstract_id=4648135)", which analyzed and systematized the results of 300 exits of foreign companies from the Russian Federation. This paper includes detailed analysis of the largest deals, main buyers/beneficiaries, continuation of trade relations after sales and many other interesting insights. You can download the full text of the study in English here: [https://papers.ssrn.com/sol3/papers.cfm?abstract\\_id=4648135](https://papers.ssrn.com/sol3/papers.cfm?abstract_id=4648135)

Also, at the end of February 2024, the KSE Institute jointly with the B4Ukraine coalition partners published the report entitled "[2024 Is the Year to Defund Russia's War - The West Holds the Key](https://b4ukraine.org/pdf/b4u_report_2024.pdf)" where, among other things, we estimated that the amount of taxes paid by foreign companies operating in Russia in 2022-2023 may amount to \$20 billion annually. You can download its full text in English here: [https://b4ukraine.org/pdf/b4u\\_report\\_2024.pdf](https://b4ukraine.org/pdf/b4u_report_2024.pdf)

<sup>4</sup> Increase in assets vs previous data is explained by adding newly collected information on the bank's assets which was not available before, as well as the addition of several new companies from the TOP-50 largest foreign companies rating by [Forbes Russia](https://www.forbes.com).

Current progress of Exiters vs others is the following:

**KSE Institute**

**% of companies exited from Russia with sale or liquidation and key statistics**

# MONTHLY FOCUS: On leaving the Russian Federation. Results of April 2024

In this digest, we will summarize the results of April 2024 and provide year-to-date statistics on full exits since the beginning of the war.

**KSE Institute**

Number of business sales and liquidations by foreign companies in Russia identified by KSE (exited)

In our project, we pay special attention to companies that have their own legal entities in Russia, pay taxes, hire staff, etc.

We would like to remind you that we assign the status of “exited” exclusively based on the results of changes in the composition of company owners in the Russian Federation reflected in the official register, or when the closing of the transaction was notified in another official way (for example, in press releases or during the disclosure of information on the Stock Exchange by public companies) or based on company’s liquidation.

There are about 1’575 companies identified in the KSE database with revenue data available of more than \$316 billion in 2021 and ~\$236 billion in 2022. And at least 387 of them have already been sold by local companies or were liquidated and left the Russian market. In April 2024 KSE Institute identified +9 new exits (also status of [Maersk](#) was downgraded and status of [Decathlon](#) was upgraded. 3 business sales and 6 liquidations took place in April 2024)<sup>5</sup>, total number of exits observed since the beginning of Russia’s invasion reached 387.

On the chart below, share of exited and other statuses based on revenue-2021 allocation is shown. It is worth mentioning when we analyze status “leave” it is also worth paying attention to sub-statuses (suspension could be treated as a temporary pause in operations while withdrawal - is a clear sign of the company’s intention to exit Russia in full).

**KSE Institute**

Share of revenue by KSE statuses for 1575 companies with financials in 2021, USD m

% of exited is 30% based on revenue allocation, those who are leaving represent 21% of total revenue (with 33% share of suspensions and 67% of withdrawals sub-statuses), % of staying companies represent 49% of revenue based on revenue generated in Russia in 2021. So we observe the situation that % of staying companies is ~ equal with % of leaving ones (which means that about 50% of pre-invasion revenue generated by foreigners is leaving Russia).

If we take a look at the same chart based on revenue-2022 distribution - the picture will be a bit different:

<sup>5</sup> It needs to be mentioned that open access to Russia’s EGRUL register was partly classified recently, so KSE Institute could miss some of the exits but we found the new solution allowing us to get the proper access to the registers in the future.

Share of revenue by KSE statuses for 1495 companies with financials in 2022, USD m

% of **exited** is 27% based on revenue allocation, those who are **leaving** represent only 14% of total revenue (with 28% share of *suspensions* and 72% of *withdrawals* sub-statuses), % of **staying** companies represent 59% of revenue based on revenue generated in Russia in 2022.

Key conclusion could be the following: on the general background of falling revenue in 2022 companies which made the decision to leave earned less than those who stayed and more companies migrated from the “suspension” sub-status to “withdrawal” showing their increased intention to cut ties with Russia.

Geography is the most important factor that explains companies' decisions. Companies from "unfriendly countries" (a term coined by the Russian Federation to describe countries that joined the international sanctions policy against the Russian Federation in response to its invasion of Ukraine) are much more likely to exit.

Here are also the breakdowns by countries and by industries of the companies which already exited:

Number of companies exited by Country of HQ

Number of companies exited by industry

So, as of the end of April 2024, companies from **37 countries** and **43 industries** have already exited showing their true reaction to the war started by Russia and its not provoked aggression against Ukraine. Most of the companies were headquartered in the USA, Germany, Finland, Great Britain, France and Sweden and operated in the “Automotive”, “Consumer goods and closing”, “Electronics”, “Energy, oil and gas”, “Finance and payments” and “Food & Beverage” industries.

For a more accurate explanation of the behavior of companies, it is necessary to take into account several factors at the same time. According to our analysis, companies in the technological and communication sector are most prone to exit (as opposed to those who remain in the Russian Federation). Partially due to the fact that they have fewer physical assets in

the Russian Federation than in the production sectors. Companies that produce products for the daily consumption of the population in the Russian Federation are less likely to leave (this is one of their key explanations why they do not leave). Pharmaceutical companies that explain their decisions by concern for public health tend to be the “staying” companies.

Companies with larger local revenue and public companies are also inclined to leave the market: presumably, large multinational corporations are more responsible for their reputation and respond to investors' requests. In addition, it is likely that the exit of the largest multinationals from the Russian Federation is not as painful for them for global business as it is for smaller companies, for which the share of the Russian market can be significant.

Here is the list of “exiters” that we were able to identify recently: [Acerinox](#) (liquidation), [Banner Batterien](#) (liquidation), [DEME Group](#) (liquidation), [Gameloft](#) (liquidation), [Veeam](#) (liquidation, not accounted before), [Vestas](#) (liquidation). Also, 3 business sales took place in April 2024: [KION Group](#), [Viciunai group](#) (sold its factory in Russia after a lengthy process, gave up rights to "VICI" trademark in the region) and [WeWork](#).

Additionally, a few final liquidations of the smaller companies which were sold before took place in April 2024: [Inditex](#) liquidated legal entities Bershka CIS LLC and STRADIVARIUS CIS LLC; [Siemens](#) liquidated LLC "SMART INDUSTRY SOFTWARE". Also, we downgraded the status of [Maersk](#) as it has stopped the liquidation of its Russian business in 2023. In February 2024, the company received 20 million rubles as an additional contribution to property. In November 2023 and January 2024, Maersk and Maersk Solutions extended the lease of offices in Moscow and St. Petersburg for another 11 months. On the other side, we upgraded the status of [Decathlon](#) as formally the sale took place in 2023 and the new chain of sports stores Desport has received a noticeable amount of excess retail space in Russia and is trying to fill it by leasing it to players in related sectors - fitness clubs, sports schools and sellers of related products.

Most of these exits were identified before in their preparation phase. Also, we are not in a hurry to assign “exited” status to many companies that are literally on the verge of exit, although they have not yet finalized this process (even though some of them have already been nationalized, partly sold their business or initiated bankruptcy procedures).

Here are just some of them: [AgroTerra](#) (According to the decree on the transfer of assets of the Agrotterra company, one of the top 15 largest landowners in the country, under state control, 100% of Agrotterra, which owns lands in Kursk, Oryol, Lipetsk, Tula, Ryazan, Tambov, was transferred to the “temporary management” of the Federal Property Management Agency. and Penza regions. In addition, the Federal Property Management Agency received 100% of its financial subsidiary AgroTerra (Capital AgroFinance), as well as AgroSistema LLC and AgroSistema-Regions LLC. The actual owner of the Russian group is the Dutch holding AgroTerra Investments B.V.), [Ariston](#) and linked with [Bosch BSH Hausgerte GmbH](#) (By his decree, Vladimir Putin transferred 100% of the shares of the Russian subsidiaries of Ariston and Bosch (BSH Hausgerte GmbH) to the management of Gazprom Household Systems), [Auchan](#) (made just some optimizations in property management, Auchan's subsidiary sold its assets in Russia. "Trading Galleries" became the new owner of the assets (real estate) of Ceetrus on April 12), [Crayon Group AS](#) (Crayon sold 80% of Crayon Russia's (currently named “Crayon” LLC) shares to local management in December 2022, with the transaction currently being at the final step before the completion of the transaction, awaiting the consent of the Russian Governmental Commission), [Embracer Group](#) (Embracer Group will split into three separate companies, and 4A Games will not become a Russian company after all), [Hugo Boss](#) (Stockmann became the buyer of the Russian business of the German clothing manufacturer Hugo Boss, which included 19 stores in Russia at the end of 2022. The deal, according to experts, could cost 800 million rubles, taking into account all the discounts. with a market value of the business of 1.8 billion rubles), [JPMorgan](#) (Russia to seize \$440 million from JPMorgan: Russian Court Freezes JPMorgan Assets Under \$440 Million Claim), [Knauf](#) (Knauf Group has decided to abandon its business in Russia and transfer it to local management. To complete the transaction, it is necessary to obtain approval from the Russian authorities. Knauf expects that the deal will save jobs for more than 4 thousand employees), [Stellantis](#) (The Stellantis concern in February 2024 announced that at the end of 2023 it was no longer related to both the joint venture in China with Dongfeng and the plant in Kaluga, control over which it considered lost. But the car plant in Kaluga, which had been shut down since April 2022, resumed production of French Stellantis cars: the Automotive Technologies company with little-known owners launched the assembly of the Citroen C5 Aircross. According to customs data, vehicle kits for assembly come from China from the Dongfeng Peugeot-Citroen Automobile plant. The Stellantis concern in February announced that at the end of 2023 it was no longer related to both the joint venture in China with Dongfeng and the plant in Kaluga, control over which it considered lost), [Vanke](#) (The Chinese Vanke Group has decided to finally get rid of its only project in Russia - the restoration of the former Imperial Orphanage near Zaryadye Park in the center of Moscow. The group agreed to sell an asset valued at RUB 30 billion).

The next review of deals for May 2024 will be available in a month.

## What's new last month - key news from Daily monitoring (updated on a monthly basis)<sup>6</sup>

30.03.2024

\***Southwind Airlines** (Turkey, Air transportation) Status by KSE - *stay*

The Finnish transport and communications agency Traficom has banned the flights of the Turkish airline Southwind Airlines to Finland due to its connections with Russia.

Former Michelin Russian tire operations rebranded as Davydovo

<https://www.european-rubber-journal.com/article/2095438/former-michelin-russian-tire-operation-has-rebranded-as-davydovo>

Recently we made a lot of significant improvements in our [Telegram-bot](#) with improving the interface, adding overall statistics and reflecting on the latest KSE statuses of companies taken from the KSE public database.

KSE team has incredible news about the project again! We are not standing still, and in addition to supporting and developing our database, which currently contains the world's most comprehensive information on the activities of global corporations on the Russian market, we are also developing our technical products. We developed a barcode scanner, which is available at the link <https://leaverussia.kse.ua/> (only for mobile devices!) or in our Telegram bot [https://t.me/exit\\_ru\\_bot](https://t.me/exit_ru_bot)! To use the scanner, you need to have a mobile phone, scan the barcode of the product in the store (or anywhere else) with a camera, and you will see information about its manufacturer and whether it also operates in Russia.

Also, thanks to the use of ChatGPT, for most companies in the consumer sector, we have created the most complete list of 7500+ major brands and trademarks, so the search has become even more convenient and better. In addition, the scanner can be saved as a regular app on the smartphone home screen and Eng/Ukr versions are available.

In July 2023, the KSE Institute, jointly with the B4Ukraine coalition partners published a new research entitled “The Business of Staying: a closer look at multinational revenues and taxes in Russia in 2022”, you can download its full text in English using the following links: <https://kse.ua/wp-content/uploads/2023/07/The-Business-of-Staying-1.pdf> and <https://b4ukraine.org/pdf/BusinessOfStaying.pdf>

In September 2023, the KSE Institute jointly with the B4Ukraine coalition partners published another research entitled “The Business of Leaving: How Multinationals Can Responsibly Exit Russia”, you can download its full text in English here: [https://b4ukraine.org/pdf/B4Ukraine\\_Business\\_of\\_Leaving\\_report.pdf](https://b4ukraine.org/pdf/B4Ukraine_Business_of_Leaving_report.pdf)

At the end of November 2023, the KSE Institute published a new study entitled "[Analysis of foreign business exits from Russia](#)", which analyzed and systematized the results of 300 exits of foreign companies from the Russian Federation. This paper includes detailed analysis of the largest deals, main buyers/beneficiaries, continuation of trade relations after sales and many other interesting insights. You can download the full text of the study in English here: [https://papers.ssrn.com/sol3/papers.cfm?abstract\\_id=4648135](https://papers.ssrn.com/sol3/papers.cfm?abstract_id=4648135)

Also, at the end of February 2024, the KSE Institute jointly with the B4Ukraine coalition partners published the report entitled "[2024 Is the Year to Defund Russia's War - The West Holds the Key](#)" where, among other things, we estimated that the amount of taxes paid by foreign companies operating in Russia in 2022-2023 may amount to \$20 billion annually. You can download its full text in English here: [https://b4ukraine.org/pdf/b4u\\_report\\_2024.pdf](https://b4ukraine.org/pdf/b4u_report_2024.pdf)

In January 2024, KSE Institute with support of volunteers developed a new application for [Apple Store](#) in addition to our database, which currently contains the world's most comprehensive information on the activities of global corporations on the Russian market.

[Leave Russia App](#) allows you to find any international brand or foreign company that is operating and paying taxes in Russia. Additionally, you can find out such statistics (if a company has local entity/ies in Russia): number of staff, revenue generated, amount of capital, assets etc. With our service, you can not only find such a company, but also check proof links with information about the company's public statement or public news that can confirm this information. [Click to download Leave Russia from the App Store!](#)

Get more details on a daily basis:
